# KESHAV VERMA

**Growth Leader | B2B SaaS · AI · GTM · Revenue & Funnel Growth**

Gurugram, India • +91-9453 99 4643 • keshavverma310896@gmail.com
LinkedIn: linkedin.com/in/keshav-verma-iitk/ • Portfolio: keshav-verma.vercel.app

## Summary

Growth leader with 6+ years across AI SaaS, B2B technology and financial-services consulting. Experienced in PLG and self-serve growth, demand generation, paid acquisition, CRM automation and funnel experimentation. At GobbleCube, scaled a performance-marketing business from inception to ₹1 Cr ARR and 150 brands, while leading a 16-member team and supporting portfolios with ₹250 Cr+ in monthly Q-commerce and E-commerce ad budgets. At Nanonets, doubled demo conversions through lifecycle automation and sustained experimentation. Brings strong analytical skills in SQL, Python and AI-enabled growth workflows.

## Experience

### GobbleCube

Gurugram, India

**Senior Growth Manager | Growth, Performance Marketing & GTM**

May 2025 – Present

- Built the performance-marketing business line from zero, shaping its growth strategy, go-to-market motion, customer proposition and operating model; scaled it to **₹1 Cr ARR** and grew the customer base from 0 to **150 brands**.
- Manage a **16-member cross-functional team** across performance operations, analytics and growth; set team structures, operating rhythms and performance-management processes.
- Oversee growth strategy for enterprise and D2C portfolios managing **₹250 Cr+ in monthly advertising budgets** across Q-commerce and E-commerce.
- Translate business targets into full-funnel media plans spanning portfolio goals, acquisition, product and city prioritisation, keyword strategy, dayparting, budget pacing, ROAS and conversion performance.
- Established a product-led growth (PLG) motion for D2C brands, using self-serve adoption and demonstrated value to identify and convert upsell opportunities into GobbleCube's performance-marketing product.
- Use SQL and product-engagement data to diagnose activation friction, shape experiments with product and engineering, and measure progression from first interaction to qualified opportunity and paid customer.
- Launched performance analytics, share-of-voice measurement, rules-based optimisation, automated bidding and rank agents with product and engineering; hyperlocal campaigns and rank agents improved ROAS by **90%** for a large FMCG brand.
- Applied AI-first analysis and LLM workflows to help brands run A/B experiments and reduce manual campaign-operations time by **80%+**, while surfacing performance and investment opportunities.
- Accelerate enterprise adoption and account expansion alongside sales and customer success, supporting programmes for **HUL, L'Oréal, Tata Consumer, Philips, ITC and GCPL**.
- Improved market share across D2C and enterprise brand portfolios, contributing to stronger business outcomes and expansion into additional categories and engagements.

### Nanonets (Y Combinator-backed AI SaaS)

Remote

**Growth Team Lead**

Aug 2023 – May 2025

- Directed inbound, outbound and mid-funnel growth for AI-powered intelligent document processing and workflow automation products, managing a **6-member team** across analytics, content, marketing and SDRs.
- Owned the email-led conversion engine across segmentation, lead scoring, intent-based workflows, persona-specific messaging and send-time experiments; **doubled demo conversions** through sustained testing.
- Defined product-qualified lead signals and sales handoff workflows, connecting product intent and engagement to lead scoring, routing, nurture and SDR follow-up.
- Configured HubSpot CRM pipelines, lead-scoring models, contact enrichment and nurture automation to strengthen MQL-to-SQL conversion and sales follow-through.
- Optimised Google Ads across high-intent keywords, balancing lead quality with acquisition efficiency.
- Introduced an automated SDR call-assist workflow that surfaced each prospect's journey and relevant product context, helping reps deliver more informed sales conversations.
- Ran SEO and organic content programmes across blogs and product pages, alongside outbound email and LinkedIn campaigns for defined ICP segments.
- Applied SQL, Python, HubSpot and LLM workflows to analyse funnel performance, automate repetitive operations and streamline marketing-to-sales handoffs.
- Extended successful experiments through ongoing iteration with product, sales and data teams, sustaining conversion improvements over time.

## Experience

### Indus Insights
Gurugram, India

**Senior Associate Consultant**
Aug 2020 – Aug 2023

- Owned analytical workstreams for financial-services clients across credit policy, loan performance, customer lifecycle analytics, segmentation and portfolio strategy.
- Presented analytical findings, clarified business requirements and discussed recommendations directly with US-based client stakeholders.
- Developed an IRB-compliant credit-risk model aligned with EBA/Basel guidelines and built Python-based automation for credit-line increase decisions.
- Designed data-led policy optimisation and mitigation frameworks that generated **$7M+ in projected bad-debt savings** for a client.
- Created dashboards and analytical tools for portfolio monitoring, churn analysis and customer segmentation; translated findings into recommendations for senior client stakeholders.

### Mitsubishi Hitachi Power Systems
Japan

**Control Systems Intern**
May 2019 – Jun 2019

- Designed and tested control logic for industrial turbine operations; supported control-panel quality checks and researched secure cloud protocols for industrial data transfer.

## Education

### Indian Institute of Technology (IIT) Kanpur
Kanpur, India

**B.Tech., Electrical Engineering and Mechanical Engineering**
Jun 2015 – May 2020

## Leadership & Activities

### Techkriti, IIT Kanpur
Kanpur, India

**Head – Show Management**
2017 – 2018

- Directed 36 associates in delivering IIT Kanpur's technical festival for 40,000 attendees, coordinating 32 events and three professional shows.
- Coordinated logistics across 22 cities for an aptitude examination and administered a ₹65 lakh operating budget covering vendors, security and technical infrastructure.

### IIT Kanpur
Kanpur, India

**Student Guide | Chess Club Coordinator & Team Representative**
2016 – 2018

- Mentored junior students through the student counselling programme and coordinated Chess Club activities; represented IIT Kanpur at Inter-IIT chess tournaments.
- FIDE-rated chess player; secured second place in the Udghosh Chess Tournament (2018).
